

Claude Code for Astronomy

An agentic coding tool for your research workflow

 Nolan Koblischke  March 2026

What is Claude Code?

```
Claude Code v2.1.92
Opus 4.6 (1M context) with high effort
Claude Max
~/.../Desktop/semantic_search_AI0N

> Look in data/. Plot L by log(P).

▶▶ accept edits on (shift+tab to cycle)
```

It **lives in your terminal** and has access to everything your terminal can do.

Edits files

Reads and writes your actual
code

Runs commands

Python, pip, git, conda —
anything

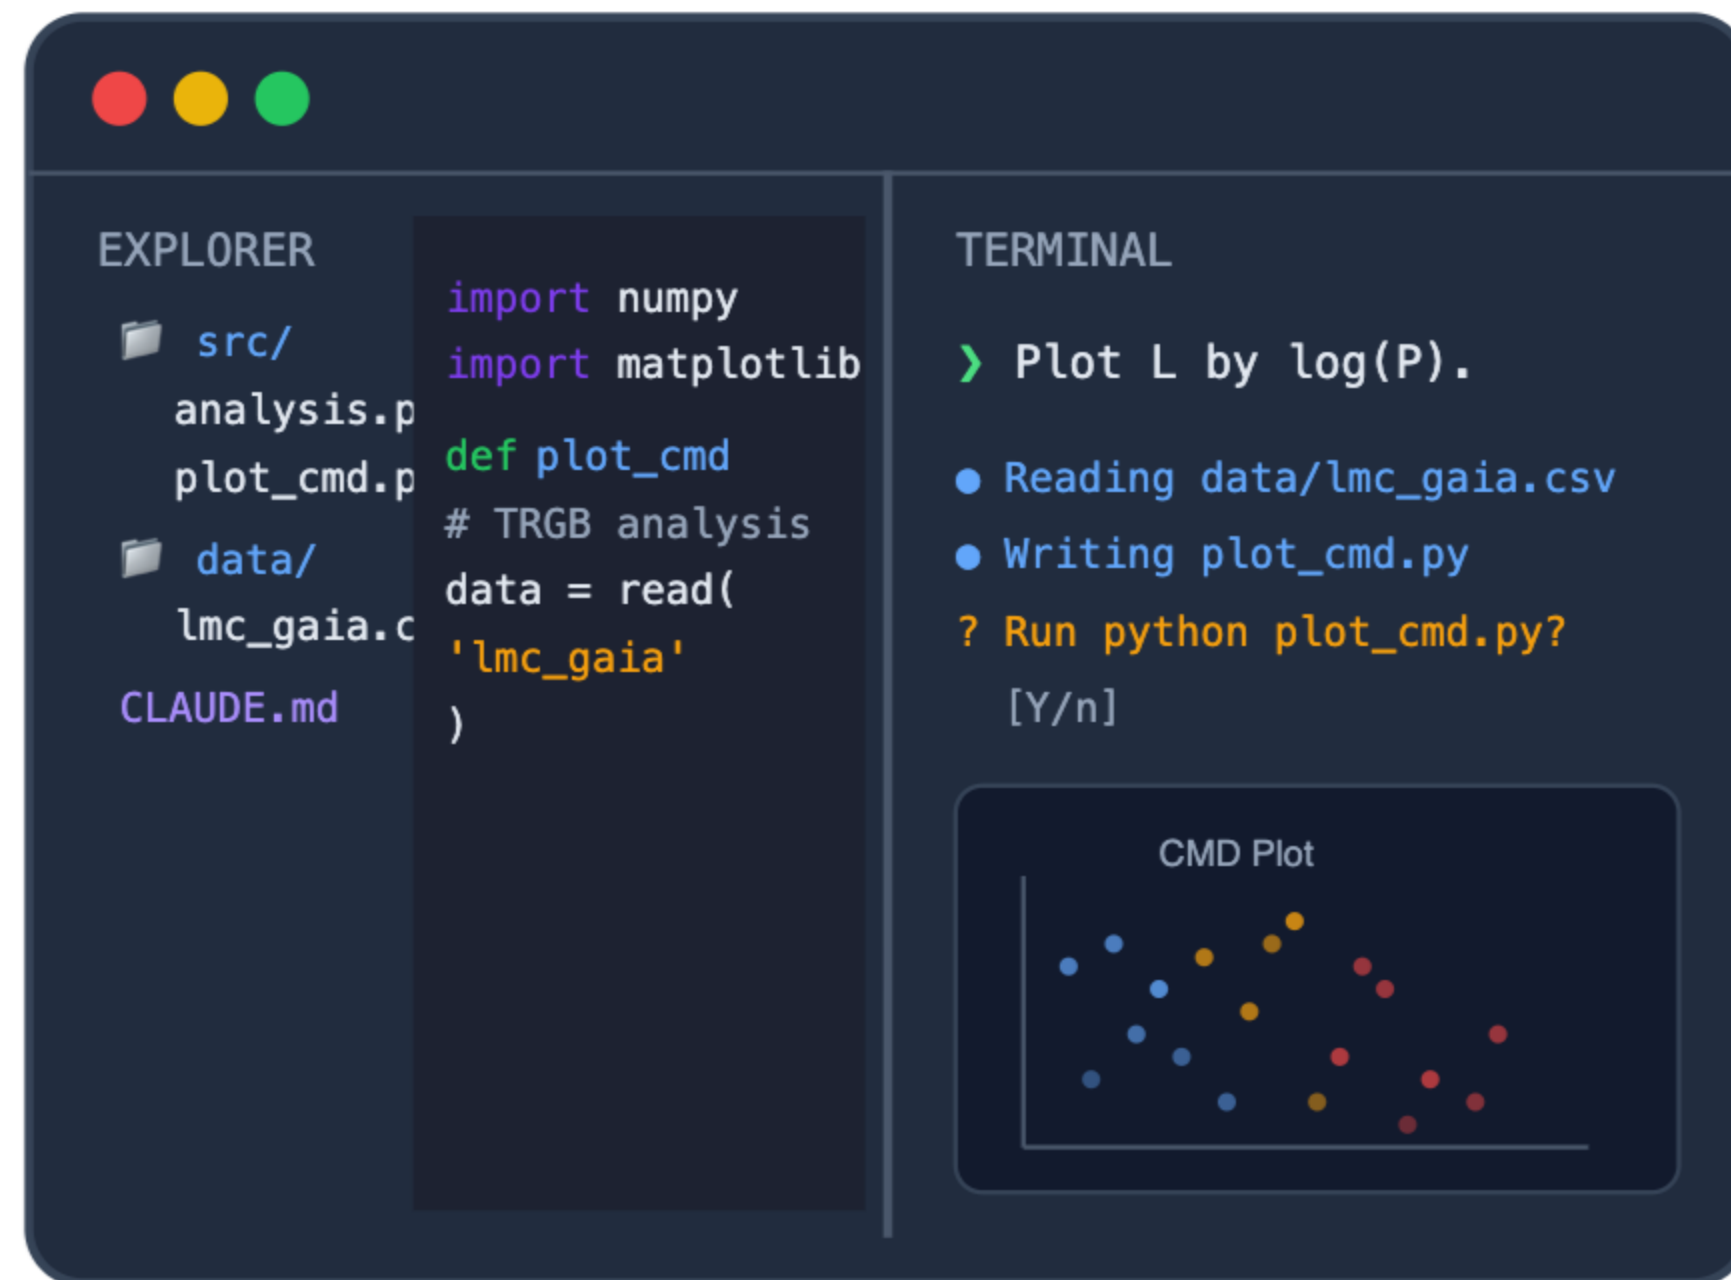

Understands context

Reads your whole project
structure

Setup

- Requires **Claude subscription**
- ChatGPT subscription? Try **Codex CLI**

- `/model` — switch Sonnet / Opus
- `/usage` — check remaining quota
- Resets every **5 hours**

- **Sonnet** — cheaper, everyday tasks
- **Opus** — expensive and powerful

The Workflow

-  **Works anywhere** — locally, remote server via SSH, or cloud sessions for GitHub repos
-  **You stay in your environment** — Claude edits real files, runs real commands
-  **Sets up everything** — environments, packages, data pipelines
-  **Replaces notebooks** — chat session acts as a notebook

Permissions

Build up trust gradually:

1

Ask every time

Default. Approves each command individually.

Safe

 `settings.json` — ban dangerous commands like `rm`

2

Accept edits

`Shift+Tab` — auto-accepts file reads/writes

Medium

 **Be careful with Sonnet**

3

`--dangerously-skip-permissions`

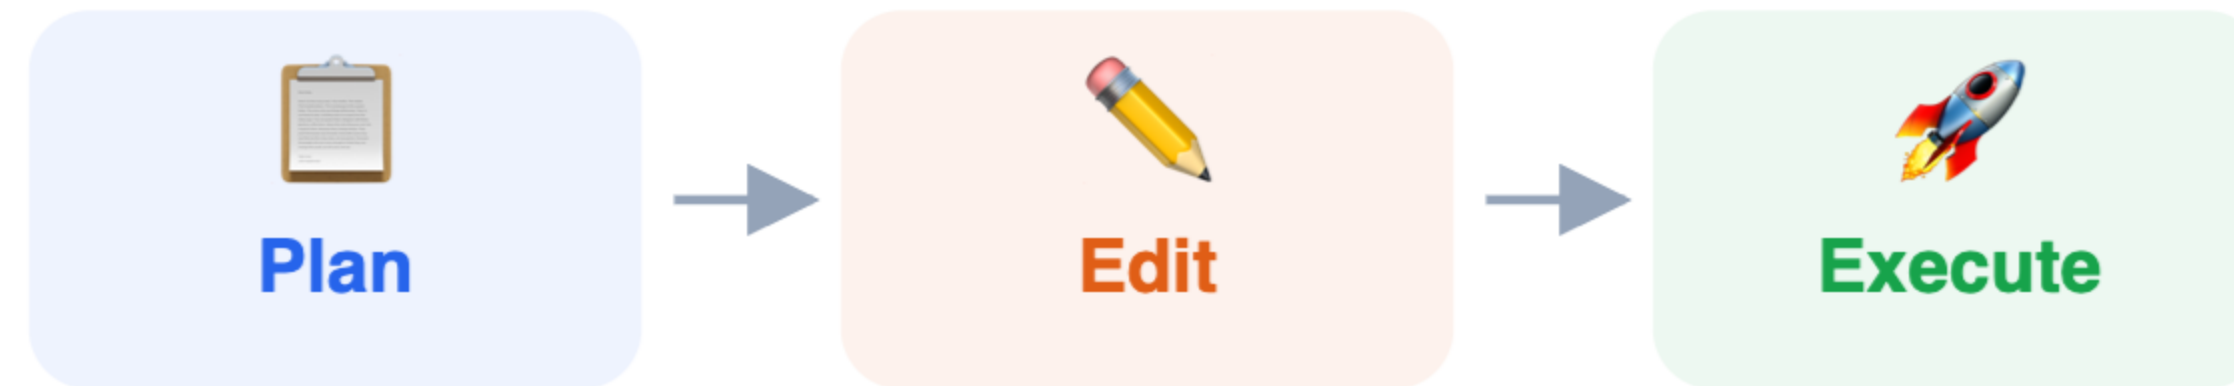

Full autonomy. Recommended on servers/containers or with Opus.

YOLO

 **Use Git** so you can revert mistakes!

Plan Mode

Plan Mode

- For complex tasks, plan first then execute
- Toggle with `Shift+Tab`

Ask User Tool

- Ask Claude to ask you questions

Literature Context

You can't rely on memorized knowledge. **Give Claude the sources it needs.**

WebSearch

- Find papers and references
- Built-in tool

Sub-agents

- For independent tasks
- Claude spins off an agent
- Saves context

Skills & CLAUDE.md

Markdown files that teach Claude new capabilities.

/playground

- Interactive HTML/JS GUIs
- Data visualization
- Built by Anthropic

/experiment-notes

- Session → Obsidian note
- Copies plots & decisions
- My custom skill

/reveal-assumptions

- Audits hidden assumptions
- Catches fabricated citations
- My custom skill

CLAUDE.md

- Persistent project memory
- Always stays in context
- Coding standards, build commands, architecture decisions

Tips & Tricks

Remote Control

- Start in terminal, continue on phone
- Claude keeps running locally

Cloud Sessions

- claude.ai/code
- No local setup needed
- Great for GitHub repos

SuperWhisper

- AI voice-to-text
- `fn` to dictate
- Free tier available

Beyond Code

Your Claude subscription includes the **Claude app** and **Cowork** — Claude Code for everything that's not coding.

Writing & editing

Papers, presentations, emails

Computer control

Clicks through your apps for you

Scheduled tasks

Monitor arXiv daily, auto-ping you with new papers

Notes organization

Organize notes, tag papers, link concepts

Making Info Accessible

The more context Claude has, the more it can do. **Point it at everything.**

Voice recordings

Dictate your thoughts,
transcribe, feed to Claude

Notes

Point it at your Obsidian notes —
it has full context

Other codebases

Clone a repo locally, say "apply
GalPy to my project"

Conclusion

```
$ curl -fsSL https://claude.ai/install.sh | bash  
$ claude
```
